

MARINE Surface Protection

GLASS

Improve wet weather vision, day or night with our optically clear Marine Glass treatment (Ultrashield). This UV stable treatment resists salts and other contaminants etching into the glass creating a low maintenance surface that repels water, oil and other contaminants. This treatment is a must for boat owners requiring clarity of vision and easy clean glass.

Benefits of Ultrashield glass treatments:

- Is optically clear, does not change light transmission values
- Can improve wet weather vision considerably, particularly at night
- Allows pilots to see imminent danger and objects earlier and clearer
- Uses a non-toxic and environmentally friendly product (Ultrashield)
- Stable over a wide temperature range and pH range
- Scratch resistant, scrubbing with soft brushes does not remove the treatment.

Warranty

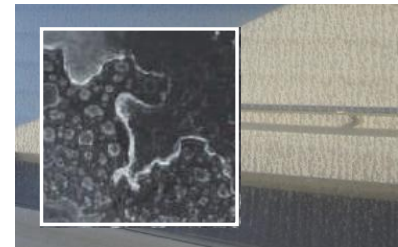

This treatment is warranted, **a)** Up to 12 months for a front screen or **b)** 2 years on side windows. The warranty is only given where glass restoration is completed by Ultrashield Ltd to remove salt stains prior to application.

Pricing

Quoted on an individual basis depending on the size, condition and location of boat.

Treated marine glass improves wet weather vision.

Typical untreated glass etched with contaminants.

METAL

Treat, seal and protect your metal surfaces in one easy step with Ultrashield. Boat railings, winches, handles are all targets for contamination and deterioration. Brown discoloration or 'tea staining' is very common with stainless steel but is most prevalent on steel exposed to harsh external environments (due to the salt of sea spray). Ultrashield metal treatment by Ultrashield creates a breathable protective layer that repels water and dirt and leaves an 'easy clean' surface.

Benefits of Ultrashield metal treatments:

- Uses a non-toxic and environmentally friendly product (Ultrashield)
- Repels water, oil and other liquids effectively
- One-step cleaner and sealer to remove stubborn stains
- Removes surface contaminations without scratching
- Extremely economical long term
- Easy to clean and to maintain.

Warranty

This clean and protect product lasts up to 12 months depending on the ongoing maintenance. Periodic reapplication will extend the life of the coating.

Pricing

Quoted on an individual basis depending on the size, condition and location of boat.

Glass restoration services available

Our professional team can restore your glass to almost new and treat it to prevent further damage.
